# Academic spin-off

Academic spin-off is a new firm created to commercially exploit some

knowledge, technology, or research results in a university.

**ASO** has significant power to promote innovation!!

**University spin-offs** (also known as **university spin-outs**)<sup>[1][2]</sup> transform technological inventions developed from university research that are likely to remain unexploited otherwise.<sup>[3]</sup> As such, university/academic spin-offs are a subcategory of research spin-offs. Prominent examples of university spin-offs are Genentech, Crucell, Lycos and Plastic Logic. In most countries,

The image shows two antelope heads, likely from a species like a topi or similar, positioned in a field of dry grass. The heads are facing each other, with one slightly behind the other. The entire scene is overlaid with a semi-transparent reddish-brown filter. Centered over the image is white text that reads "There are actually CONFLICTs!!". The word "CONFLICTs" is in a larger, bold, all-caps font, while the rest of the text is in a smaller, regular font.

There are actually  
**CONFLICTs!!**

# Cognitive Gap

The teamwork

# How Heterogeneous Team ended up in Conflict?

Wide Gap of **Priority** in business.

**Minimizing risk & Maximizing profit**

VS

**Achieving Scientific Goal**

Manager

Researcher

When other company have the producing know-how  
that they don't have,

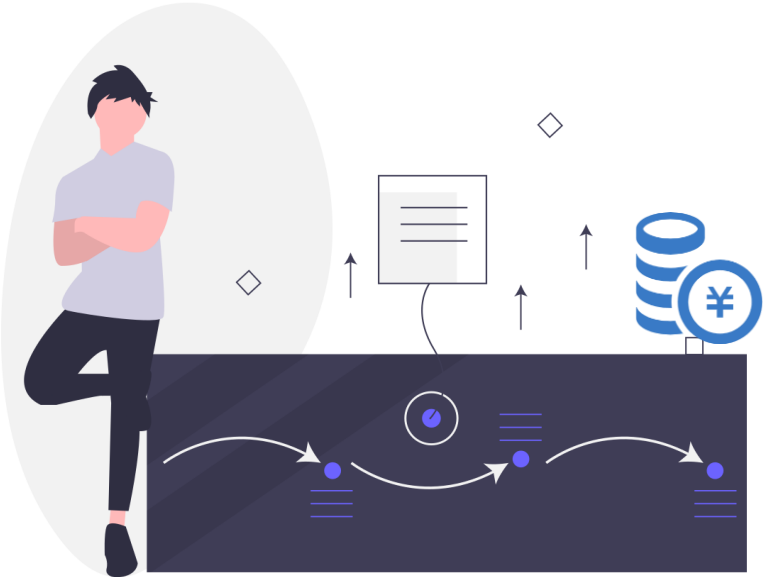

**outsourcing is...?**

In terms of business

**Great RISK** of loosing the company's superiority, stability, and profits,  
so we should develop **by ourselves**

even if it takes a lots of time and cost.

In terms of academic science

The **Quickest way** of making the findings into products,  
so we should **ask others to produce**  
without the waste of resource.

Such **cognitive gap** make the team less united,  
and make the researcher **feel discouraged**.

MODEL

Finally, the researcher **quit** the further **help** for R&D  
that is essential for business.

Homogeneous  
Team

Collaboration

# How Homogeneous Team achieve Collaboration?

**Common understanding** to the core tech  
and previous **Relationships of mutual trust**  
make the cognitive gap **small enough to solve** easily.

**Emotional  
commitment** to the core tech itself  
is the **strong driving force**  
to overcome every challenge.

Cognitive Gap is

**so wide to break up the team**

**narrow enough to fill up**

Di: Teammates assembled for **efficient** business but ended up in **inefficient** teamwork.

A group of four people (two women and two men) are standing on a hillside, looking out over a vast valley at sunset. They are standing with their backs to the camera, and their arms are around each other's shoulders in a supportive gesture. The scene is bathed in the warm, golden light of the setting sun, which is visible as a bright glow in the lower center of the frame. The background shows rolling hills and a valley filled with sparse vegetation. In the bottom left corner, there is some gear, including a backpack and a green water bottle.

Thank You!
